8. OBJECTION HANDLING

Title:

Frequently asked Questions

Is this legal in the US?

Yes. The system is designed to follow standard outreach safeguards used by real estate teams. Calling windows are restricted to appropriate hours, opt-out requests are respected, and suppression rules can be applied to prevent further contact when requested. You remain in control of how your outreach is used and which leads are contacted.

Do I need technical skills to use this?

No technical experience is required. The workflow is simple: upload your leads, choose your settings, and start the automation. The platform handles calling, logging, scoring, and reporting automatically, so your team can focus on conversations and deals instead of setup or technical tasks.

How quickly can I get started?

Most teams are ready to launch within 24 hours after onboarding. Once your account is set up and your lead list is uploaded, the system can begin calling and populating your dashboard right away.

The answer would be hidden first, if clicked to the dropdown the answer will be shown.
